Workshops in Montréal on Service Provider Strategies to Reduce Environmental Risks to Child Health

Organized by the Allergy and Environmental Health Association of Québec
 Supported by the Québec College of Family Physicians

Workshop Description: This workshop will share important information about environmental risks to child health, including environmental exposures at home, work, school, and outdoors, in the food we eat, the air we breathe, and the products we use. It will also provide simple child proofing tips and service provider strategies to reduce the risks to preconception, prenatal and child health. The workshop will help you identify the risks of highest concern in your community, and initiatives that will support or enhance existing programming.

For: Professionals who address environmental risks to child health, including early learning practitioners, teachers, environmental action groups, health care providers, health promoters and community development workers. This workshop will be of interest to service providers who work in the areas of preconception, prenatal and/or child health.

Speaker: Myriam Beaulne, Health Promotion Coordinator for the Canadian Partnership for Children's Health and Environment (CPCHE)

www.healthyenvironmentforkids.ca. Myriam has many years of experience in environmental toxicology, ecology, and environmental law and a strong commitment towards the protection of our environment and our health. Myriam has worked for government agencies, educational institutions, labs and non-profit organizations in Canada and the United States.
