Subject: Concerns Regarding Per- and Polyfluoroalkyl Substances (PFAS)

I am writing as a concerned citizen regarding the health impacts of per- and polyfluoroalkyl substances (PFAS). I urge the government to take immediate action to ban these harmful substances without any phase-out period.

To protect us, I request that the government bans PFAS right away, without a phase-out. Waiting would mean more exposure to these hazardous substances, which can lead to serious health issues. We cannot afford to delay action any longer.

Furthermore, I urge the government to expand its efforts to address other harmful substances as well. It is crucial to thoroughly examine the safety and impact of chemicals used in everyday products and industrial processes. By doing so, we can safeguard the health and well-being of all Canadians.

Please consider my concerns and take immediate action to ban PFAS, prioritize the health of Canadians, and protect our environment. Strong leadership in chemical management is vital for the safety and well-being of our nation.

Thank you for your attention to this urgent matter. I eagerly await your response and decisive action on this critical issue.

Best,
