

MULTIPLE CHEMICAL SENSITIVITIES (MCS) IT'S TIME TO CATCH UP WITH THE SCIENCE

WHEN: WEDNESDAY, SEPTEMBER 27, 2023 | 6:45 PM EST

Join us for a workshop on MCS, a recognized disability and medical condition, increasing in prevalence, where over one million people have a diagnosis, of whom 72% are women, and 50% are over 55 (Statistics Canada 2020).

Hosted By:

The Environmental Health Association of Canada, the Environmental Health Association of Quebec, the Planetary Health Committee of IFMSA-Qc, and McGill's Sustainability Committee.

Explore Topics Such As:

- Understanding MCS: Comprehensive insights into the science and medical aspects of MCS.
- Clinical Practice and Environment: Examination of diagnosis, environmental and occupational impacts.
- Legal Framework: Interpretation and exploration of the legal considerations surrounding MCS.

The Speaker Line-Up Includes:

- **Dr. John Molot**: Medical Advisor at Environmental Health Associations of Canada & Quebec. Title of the talk: Environmental Health and MCS: Biological and Clinical Aspects.
- **Dr. Farah Tabassum**, MD FCFP: Staff Physician, Environmental Health Clinic, Women's College Hospital. Title of the talk: A close look at a Canadian Environmental Health Clinic.
- **Dr. Caroline Barakat**, PhD: Associate Professor in Environmental / Occupational Health at Ontario Tech University. Title of the talk: An epidemiological perspective of research on indoor air quality and health.
- **Robert Lattanzio**, LLB: Executive Director, ARCH Disability Law Centre. Title of the talk: A Legal Perspective on MCS.
